Paul Buhler, Mechanic
Shilo Farms, Brandon, MB, Canada

“We welded Ferobide to the point and wings of our John Deere nine leg inline ripper. Results are as follows:

Standard point at $199  110  acres
Standard point + hard facing  220  acres
Standard point + Ferobide  1,100  acres

We completed the ripping process 3 days sooner than usual thanks to savings in downtime, greatly helped by using Ferobide.”
Subsoiler Foot Protected with Ferobide After 800 Acres

Subsoiler Wing Protected with Ferobide After 800 Acres

Subsoiler Point Protected with Ferobide After 800 Acres
